|  Tangerang Regency, Indonesia

Final-year Information Technology student at Universitas Tangerang Raya with hands-on experience in developing web-based information systems using Laravel, Next.js, PHP, JavaScript, MySQL, and PostgreSQL. Experienced in designing and implementing archive management, attendance, meeting scheduling, and business information systems through internships and academic projects. Strong analytical and problem-solving skills with a passion for backend development, web application architecture, and delivering practical digital solutions.

WORK EXPERIENCES

Universitas Tangerang Raya | Tangerang

Computer Lab Assistant
2024

May 2024 – November

- Assisted students and faculty with troubleshooting basic hardware and software issues, including printer setup, login errors, and Microsoft Office problems.
- Maintained and monitored lab computers and peripherals to ensure they function properly and consistently.
- Reduced system downtime by 35% through proactive equipment checks and basic troubleshooting routines.
- Improved user experience by providing guidance and mini-training sessions on using productivity tools like Word, Excel, and Google Workspace.

Dinas Tenaga Kerja Kab. Tangerang | Tangerang

Information System Intern

May 2025 – August 2025

- Digitally input and manage archive data to improve the order and accessibility of internal documents.
- Troubleshoot software glitches such as Microsoft Word and Excel, and provide basic solutions to daily technical issues.
- Developed and implemented a web-based archive management and employee attendance system using Laravel and MySQL.
- Reduced manual archive searching by approximately 50% through digitization and optimized document management.
- Delivered technical support, software troubleshooting, and user guidance to improve operational efficiency.

Freelance Web & Mobile Developer | Self-Employed

Tangerang

Maret 2025 - Present

- Developed web-based and mobile applications for university students, including practical assignments, semester projects, and final-year projects.
- Analyzed project requirements and designed application workflows, database structures, and user interfaces.
- Developed applications using Laravel, Next.js, PHP, JavaScript/TypeScript, MySQL, and PostgreSQL.
- Implemented authentication, CRUD operations, dashboards, reporting, database management, and API integrations.
- Conducted application testing, debugging, revisions, and deployment based on project requirements.
- Managed development projects independently from requirements analysis through application delivery.

PROJECTS

Meeting Scheduling Information System

BAPENDA Kabupaten Tangerang

Next.js • TypeScript • PostgreSQL • Tailwind CSS • Telegram Bot
